Press Release

Wreck Photo and Video Week in November

From 8th of November until 15th of November 2008

Grenada, September 16, 2008: **Aquanauts dedicates one week in November to the large portfolio of wrecks sunk around Grenada's coast. From the famous "Titanic of the Caribbean" – the wreck of the Bianca C cruise ship to the beautifully covered Veronica L, the waters around Grenada are abound with wrecks of all sizes and shapes in all depth. An abundance of Marine life may be encountered from large eagle rays and sharks, turtles to small critters such as frog fish and seahorses – all seeking the wrecks as their habitat.**

Participants are to video and photograph these artificial reefs from inside and out, producing a comprehensive virtual guide of all wrecks around the isle of spice. Every day a new challenge and a new wreck for the photographers and videographers. The results will be shown every evening at the Dodgy Dock Bar for judging. For each wreck there will be a best video and a best slide show chosen, which will be included in the final Grenada Wreck DVD.

The package with True Blue Bay Resort includes Breakfast, lunch and dinner, (add on nights are available) daily 3 dives, free Nitrox 30% house mix, welcome drink and airport roundtrip transfer.

Price: 1733,- US\$ per person/double occupancy. Come and explore the wreck capital of the Caribbean – warm blue waters, friendly people, great company, boutique hotel, convenient access to boats and lots of fun.
